## SUMMARY

---

Hard working and ambitious Frontend developer with over 4 years of experience in IT include 2+ years in WEB technology. I have a keen eye for details and most of my working life has been dedicated to creating stunning websites. Good experience in development of web applications for using HTML, CSS, JavaScript, React, AJAX, JSON. Good hands-on experience and knowledge of JavaScript MVC framework like React, UI framework like Tailwind, store manager like Redux and MobX. Professional knowledge and experience with Oracle database and PL/SQL programming.

## PROFESSIONAL EXPERIENCE

---

**ABR Region LLC**, October 2021 – Present, Moscow (Russia)

### Frontend Developer

I helped to develop and implement more than 10 web pages, graphics, and marketing materials under direction of UX manager and development team.

Key responsibilities:

- Full Layout of adaptive sites of varying complexity using HTML5, CSS3, SCSS (using variables and loops).
- Development of the client side of new products using: React, Redux, React-Router, React hooks, JS, AJAX, JSON, Tailwind
- Refactoring of existing code
- Working with API, Firebase
- Photoshop, Figma were used to work with the design.

Key achievements:

- A website for the internal schedule of conferences and meetings has been developed. This project helps manage communication within teams

**ABR Region LLC**, October 2020 – Present, Moscow (Russia)

### Data base developer

Fixed 200+ different bugs on many production projects, integrated many new function for business products.

Key responsibilities:

- Writing and developing SQL queries and PL/SQL scripts to eliminate problems and discrepancies in the database of software clients, unload information, and other tasks related to interface-database errors.
- Writing instruction for another department on scripts
- Optimize SQL queries

Key achievements:

- Help and develop new algorithms for getting\posting payments on database
- Develop many new reports for server

**Hospitality & Retail Systems**, February – August 2020, Moscow (Russia)

### IT Service Delivery Specialist

Product integration and maintenance for hotel business management.

#### Key responsibilities:

- Working with customer requests online on line 1 - telephone consultations and prompt resolution of issues during a remote connection,
- Case escalation to 2nd and 3rd support level
- Work at the 2nd and 3rd levels of technical support - search, analysis of logs systems, performance of paid works of various kinds: server migration,
- Server administration and configuration, software deployment, development
- Reports in BI Publisher
- Writing SQL scripts (Oracle, PostgreSQL)
- Prioritize issues of varying severity and service levels and their solution
- Project management, registration and management of calls to the technical service customer support using corporate CRM system
- Business trips to integrate the product into customer infrastructure
- Communication with foreign colleagues and clients in English
- Testing and fixing bugs in new releases before they are released
- Debug network and other issues related to the product (tcpdump, etc.)

#### Key achievements:

- Concluded 2 contracts and carried out a comprehensive integration of the product in the customer's infrastructure with their further support in terms of technical support on lines 1, 2 and 3
- Advised up to 30 clients daily on the use of the software (1 line), and also provided technical support via remote connection (often work on lines 1, 2 and 3 intersected and went in parallel)
- Conducted several offline trainings for staff (hotel staff) on how to work with the system for groups of 10-15 people.

#### EDUCATION

---

##### **Bauman Moscow State Technical University**

September 2014 – June 2018

Bachelor's degree of plasma technology;
